

PATIENT BEHAVIOR TRACKER

The following behavior tracker sheet can be used to keep a record of your child’s ADHD associated behavior during the administration of Vayarin®, a medical food for the dietary management of ADHD.

As you fill this out, think about the time of day when your child is most challenged (such as morning, meal time, transitions, evening, bed time). Use the chart below to record his/her behavior before using Vayarin®, then at 30, 60, and 90 days after starting use.

EXAMPLE	START	30 DAYS	60 DAYS	90 DAYS
Attribute A	1	2	5	7
Attribute B	2	2	4	5

		START	30 DAYS	60 DAYS	90 DAYS
INATTENTION	Pays attention in class				
	Follows and completes assignments				
	Remembers tasks, planned activities				
	Listens when spoken to directly				
EMOTIONAL DYSREGULATION	Waits for or responds during his/her turn				
	Gets along with others				
	Thinks things through before acting				
	Can calm himself/herself down				
	Falls asleep and stays asleep through the night				
Overall behavior
